## VOTING SYSTEMS ASSESSMENT PROJECT (VSAP)

## **STAKEHOLDERS**

## **Pursuing a Voter-Centered System Design**

The VSAP was developed as a collaborative project between community stakeholders, organizations and Los Angeles County by the Registrar-Recorder/County Clerk in 2009 to address an aging voting system and an increasingly large and complex electorate.

The journey began on the campus of Caltech in 2009. Since then the Voting System Assessment Project has made significant progress and challenged the traditional way of developing a voting system.

Through field research and coalition building, the RR/CC has pioneered a voter-centered approach to voting system design and development. The approach has set Los Angeles County as the benchmark for an anticipated revolution in voting systems.
